

NAMA : FEBRIANTO RIDWAN SYAH

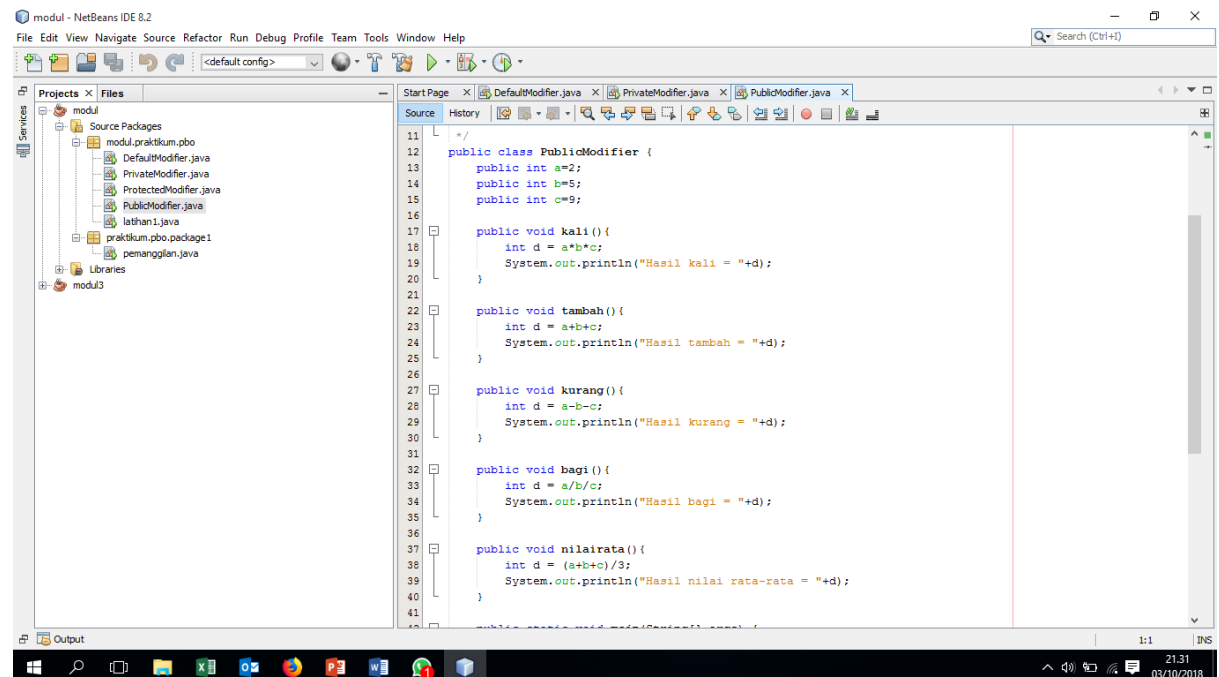

NIM : L200170121

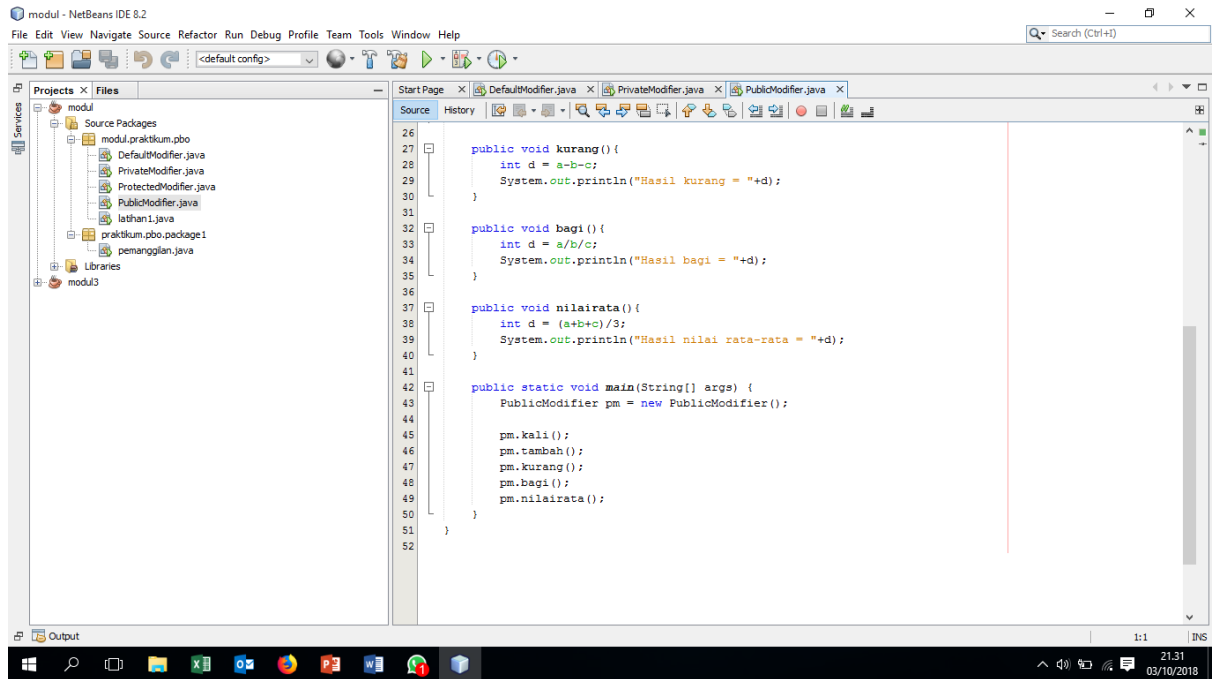

KELAS : B

1. DEFAULDMODIFIER

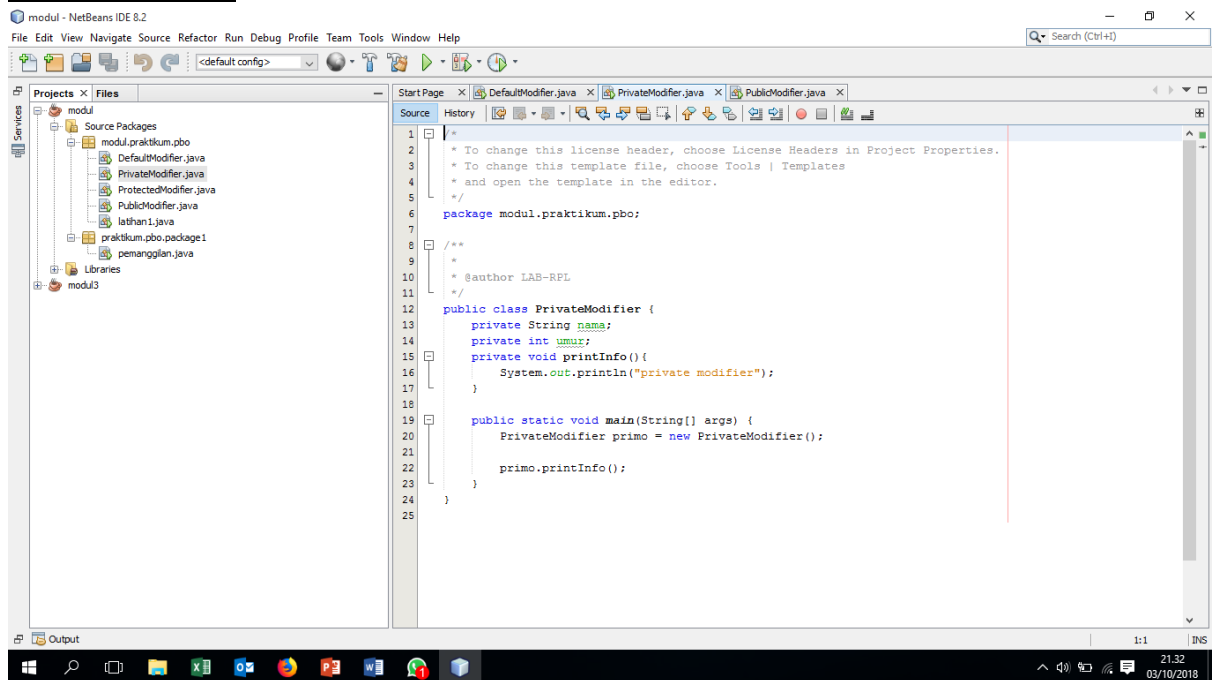

2. PUBLICMODIFIER

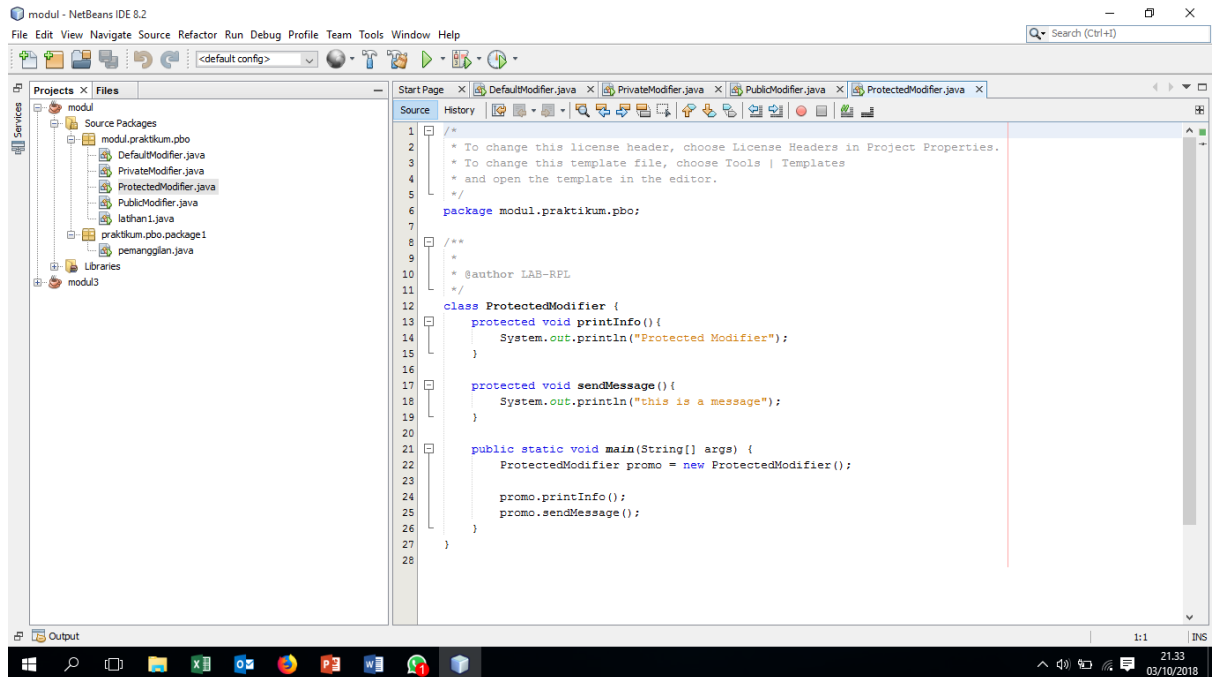

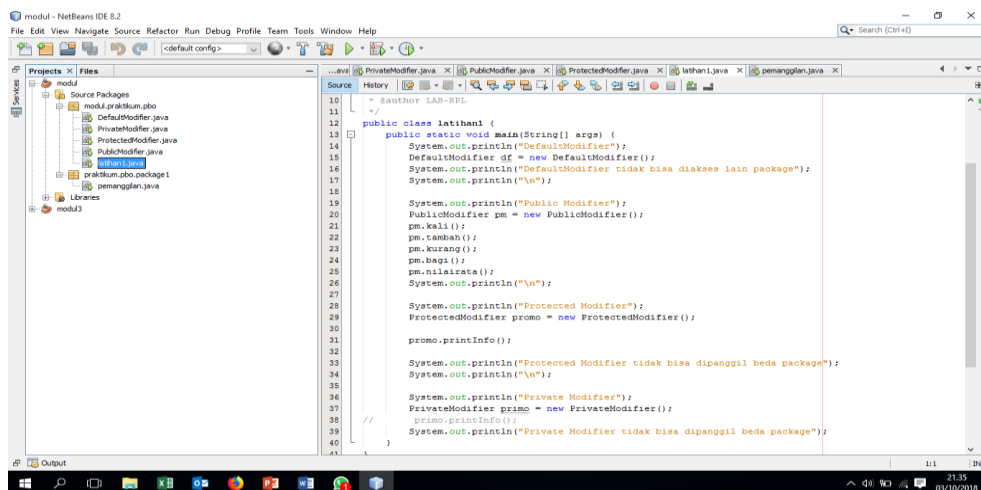

3. PRIVATEMODIFIER

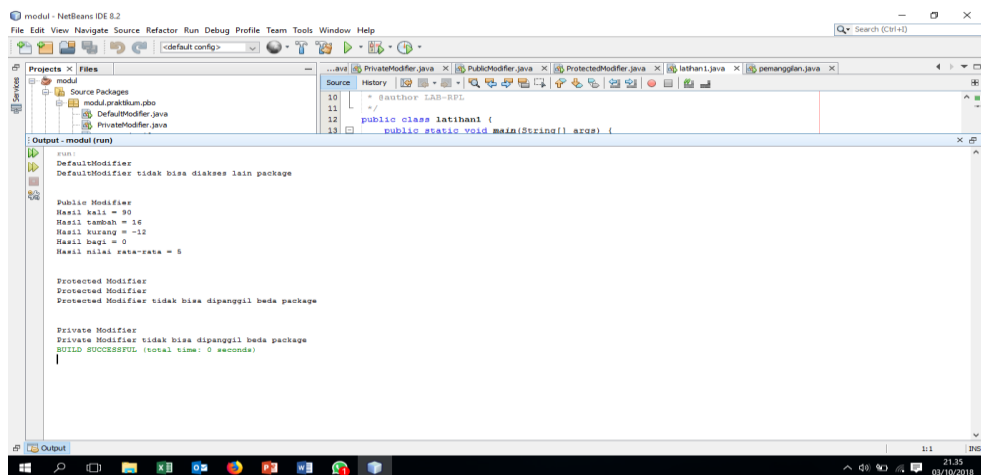

4. PROTECTEDMODIFIER

5. PEMANGGILAN DALAM 1 PACKAGES

HASIL

6. PEMANGGILAN PADA BEDA PACKAGES

```
13  * @author LAB-REFL
14  */
15  public class pemanggilan {
16      public static void main(String[] args) {
17          System.out.println("DefaultModifier");
18          DefaultModifier df = new DefaultModifier();
19          System.out.println("DefaultModifier tidak bisa diakses lain package");
20          System.out.println("\n");
21
22          System.out.println("Public Modifier");
23          PublicModifier pm = new PublicModifier();
24          pm.kali();
25          pm.tambah();
26          pm.kurang();
27          pm.bagi();
28          pm.nilaiRata();
29          System.out.println("\n");
30
31          System.out.println("Protected Modifier");
32          ProtectedModifier promo = new ProtectedModifier();
33          // promo.printInfo();
34          System.out.println("Protected Modifier tidak bisa dipanggil beda package");
35          System.out.println("\n");
36
37          System.out.println("Private Modifier");
38          PrivateModifier primo = new PrivateModifier();
39          // primo.printInfo();
40          System.out.println("Private Modifier tidak bisa dipanggil beda package");
41          System.out.println("\n");
42      }
43  }
```

HASIL

```
run:
DefaultModifier
DefaultModifier tidak bisa diakses lain package

Public Modifier
Hasil kali = 90
Hasil tambah = 16
Hasil kurang = -12
Hasil bagi = 0
Hasil nilai rata-rata = 5

Protected Modifier
Protected Modifier tidak bisa dipanggil beda package

Private Modifier
Private Modifier tidak bisa dipanggil beda package

BUILD SUCCESSFUL (total time: 0 seconds)
```
